Press Release

Use of Non-GAAP Financial Measures

In this earnings release, the company supplements its reporting of information determined in accordance with GAAP, such as revenue, operating income, operating margin, income from continuing operations, net income, earnings per share from continuing operations, earnings per share and net cash provided by operating activities, with “adjusted revenue,” “internal revenue growth,” “adjusted operating income,” “adjusted operating margin,” “adjusted net income,” “adjusted earnings per share,” “adjusted earnings per share, as adjusted for the Lending Transaction impact,” and “free cash flow.” Management believes that adjustments for certain non-cash or other items and the exclusion of certain pass-through revenue and expenses should enhance shareholders’ ability to evaluate the company’s performance, as such measures provide additional insights into the factors and trends affecting its business. Therefore, the company excludes these items from GAAP revenue, operating income, operating margin, income from continuing operations, net income, earnings per share from continuing operations, earnings per share and net cash provided by operating activities to calculate these non-GAAP measures. The corresponding reconciliations of these non-GAAP financial measures to the most comparable GAAP measures are included in this earnings release, except for forward-looking measures where a reconciliation to the corresponding GAAP measures is not available due to the variability, complexity and limited visibility of the non-cash and other items described below that are excluded from the non-GAAP outlook measures. See page 14 for additional information regarding the company’s forward-looking non-GAAP financial measures.

Examples of non-cash or other items may include, but are not limited to, non-cash deferred revenue adjustments arising from acquisitions, non-cash intangible asset amortization expense associated with acquisitions, non-cash impairment charges, severance costs, charges associated with early debt extinguishment, merger and integration costs, certain costs associated with the achievement of the company’s operational effectiveness objectives, gains or losses from dispositions and unconsolidated affiliates, and certain discrete tax benefits and expenses. The company excludes these items to more clearly focus on the factors management believes are pertinent to its operations, and management uses this information to make operating decisions, including the allocation of resources to the company’s various businesses.

Internal revenue growth and free cash flow are non-GAAP financial measures and are described on page 13. Management believes internal revenue growth is useful because it presents revenue growth excluding acquisitions, dispositions and the impact of postage reimbursements in the company’s Output Solutions business, and including deferred revenue purchase accounting adjustments. Management believes free cash flow is useful to measure the funds generated in a given period that are available for debt service requirements and strategic capital decisions. Management believes this supplemental information enhances shareholders’ ability to evaluate and understand the company’s core business performance.

These non-GAAP measures may not be comparable to similarly titled measures reported by other companies and should be considered in addition to, and not as a substitute for, revenue, operating income, operating margin, income from continuing operations, net income, earnings per share from continuing operations, earnings per share and net cash provided by operating activities or any other amount determined in accordance with GAAP.
