Part II Organizational Action
Attach additional statements if needed. See back of form for additional questions.

14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders’ ownership is measured for the action. On February 22, 2018, Fiserv, Inc. announced a two-for-one stock split of the company’s common shares.

Each stockholder of record on the close of business on the record date received one additional share of common stock for each share held. The record date for the stock split was March 5, 2018 with the shares distributed on March 19, 2018.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis. The action’s effect on a stockholder’s basis of one common share is to allocate 50% of the basis in each share held before the stock split to that share and allocate the remaining 50% to the additional share distributed in the stock split. See the example below in #16.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates. A shareholder will multiply the basis in each share held before the stock split by 50% to determine the basis in that share after the stock split and the additional share distributed in the stock split.

Example:

Before the stock split: A stockholder owns 100 shares of Fiserv, Inc. common stock with a basis of $50 per share and $5,000 in total.

After the stock split: A stockholder holds 200 shares of Fiserv, Inc. common stock with a basis of $25 per share and $5,000 in total.

For Paperwork Reduction Act Notice, see the separate Instructions.
